

NANTHAKUMAR K

DevOps Engineer | Cloud Engineer | Software Engineer

+91 9629978640 | nanthakumarkrishnamoorthy26@gmail.com | Chennai,Tamilnadu | [LinkedIn](#)

DevOps and Cloud Engineer with hands-on experience in AWS cloud infrastructure, Infrastructure as Code, CI/CD, containerization, configuration management, Linux administration, networking, and application deployment. Proficient in Terraform, Docker, GitHub Actions, Ansible, Git, Nginx, and AWS, with exposure to GCP and Azure. Built and managed AWS environments using VPC, subnets, Internet Gateway, NAT Gateway, Application Load Balancer, Auto Scaling Groups, Security Groups, IAM, and health checks. Strong troubleshooting skills across deployment, networking, and infrastructure environments, complemented by prior experience in React, TypeScript, and UI/UX development.

Skills

Cloud Platforms : AWS, Google Cloud Platform (GCP), Microsoft Azure

Containers : Docker, Docker Compose

Infrastructure as Code : Terraform, Terraform Modules, Variables, Outputs, Map/Object Variables

Configuration Management : Ansible, SSH, Remote Server Configuration

Version Control : Git, GitHub

Web Servers & Process Management : Nginx, PM2

Programming & Scripting : Bash, JavaScript, TypeScript

AWS Services : EC2, VPC, IAM, Application Load Balancer (ALB), Auto Scaling Groups (ASG), Launch Templates, AMI, NAT Gateway, Internet Gateway, Route Tables, Security Groups, Elastic IP

DevOps & CI/CD : Git, GitHub, GitHub Actions, CI/CD, Continuous Integration, Continuous Deployment, Deployment Automation

Operating Systems & Networking : Linux, Linux Administration, SSH, TCP/IP, DNS, HTTP/HTTPS, Subnets, Routing, Public/Private Networks, Security Groups

Professional Experience

SEERTECH SYSTEMS - Software Engineer | Nov 2024 - Jul 2026 | *Chennai, India*

- Worked with cloud infrastructure and deployment activities across **AWS, Google Cloud Platform (GCP), and Microsoft Azure environments.**
- Configured and deployed cloud infrastructure across **AWS, GCP, and Azure environments**, supporting application **hosting, deployment, and infrastructure** troubleshooting.
- Managed application hosting and process management using tools such as **Nginx and PM2.**
- Developed and maintained **GitHub Actions CI/CD workflows** to automate application **build, validation, and deployment** processes.

Projects

Infrastructure Provisioning & Automation

- Designed and provisioned AWS infrastructure using Terraform modules, including VPC, public/private subnets, **EC2, IAM, Security Groups, Elastic IP, Internet Gateway, NAT Gateway, route tables, and ALB.**
- Deployed an Application Load Balancer across multiple Availability Zones with target groups and HTTP health checks.Used Terraform **modules, variables, outputs and map/object variables** to create reusable infrastructure configurations
- Containerized applications using **Docker and Docker Compose**, defining application environments and dependencies through Dockerfiles and Compose configurations..

CI/CD Pipeline using GitHub Actions

- Created a **GitHub Actions CI/CD pipeline** to automate source-code checkout, **dependency installation, linting, application build, and deployment.**
- Configured a **self-hosted GitHub Actions runner** for executing CI/CD workflows.

Server Configuration Management using Ansible

- Configured Ansible control and managed nodes using SSH key-based authentication and automated **Linux server configuration** through **Ansible playbooks, inventories, variables, handlers, and modules.**

Education

Bachelor of Science in Physics
Syed Ammal Arts and Science College | Apr 2020

Successfully Completed **Full Stack Web Development Course on Error Makes Clever Academy** | Feb 2024

Achievements

- Expanded responsibilities from Frontend Development into Cloud & DevOps
- Contributed across multiple technical functions within a startup environment
